| Item | Each Trip | Each Mo. | 3 mos. | 6 mos. | Each Year | As Req. | Procedure |
|---|---|---|---|---|---|---|---|
| **Fiberglass Exterior** | | X | | | | | Wash with warm water and mild detergent |
| | | | | X | | | Wax with liquid or paste wax |
| **Roof & Roof Components** | | X | | | | | Inspect and re-seal as needed |
| | | | | X | | | Lubricate roof vent mechanism w/light oil & clean completely |
| **Windows & Doors** | | X | | | | | Check vinyl seals when washing exterior |
| | | | X | | | | Check seals for damage and repair as needed |
| | | | X | | | | Lubricate door hinges & step components as needed |
| | | | | | X | | Adjust & lubricate window latches w/powdered graphite or light oil |
| | | | | | X | | Lube door locks & strike pocket, incl. exterior storage & access doors |
| **Seals & Adhesives** | | X | | | | | Inspect and re-seal as needed |
| **LP Gas System** | | | | | | X | Check for leaks and road damage |
| | | | | X | | | Have qualified service person check for leaks & adjust if needed |
| **Water & Drainage** | | X | | | | | Check hoses, fittings and connections for leaks and signs of wear |
| | X | | | | | | Check drainage system for leaks and road damage |
| | | | | | | X | Sanitize system |
| | | | | | X | | Winterize system depending on local seasonal conditions |
| **Electrical System** | X | | | | | | Check GFI circuits |
| | | | | | | X | Perform maintenance on generator as outlined in generator manual |
| | | | | | | X | Check and service batteries |
| **Appliances** | X | | | | | | Remove food and ice from refrigerator after each trip |
| | | X | | | | | Clean fan blades and wash filter on range exhaust hood |
| | | X | | | | | Check for obstructions and dirt on exterior appliances vents |
| **Slide-Out Mechanisms** | | | | | | X | Lubricate slide-out rails |
| **Safety Equipment** | | | | | X | | Clean smoke detector |
| | X | | | | | | Test smoke detector operation |
| | X | | | | | | Test LP leak detector / CO detector |
| | | | X | | | | Check fire extinguisher pressure and condition |
| | | | | | | X | Replace detectors as recommended by manufacturer |
| **Trailer Lights** | X | | | | | | Check all clearance lights for function |
| | X | | | | | | Check brake and turn signals for function |
| **Carpeting** | X | | | | | | Vacuum after each trip |
| | | | | | | X | Clean |
| **Wood Surfaces** | | X | | | | | Clean pre-finished panels and wood |
| **Seats** | | | | | | X | Lubricate all mechanisms and inspect for proper operation |
| | | | | | | X | Check all seat belt buckles, release mechanisms & belt webbing |
| **Chassis & Components** | | | | | | X | Follow chassis lubrication & maintenance procedures & schedules |
| **Weight & Distribution** | X | | | | | | Be sure unit is within specified load limits & weight distribution |
| **Axles (Towable)** | | | | X | | | Mounting bolts should be torqued to manufacturers specifications |
| **Springs** | | | | | X | | Check for broken or flattened springs |
| **Suspension** | | | | | X | | Check for worn or loose fasteners and shackle link wear |
| **Wheel bearings (Towable)** | | | | | X | X | Repack wheel bearings yearly |
| | | | | | X | X | Check for damage or wear |
| | | | | | X | | Inspect seals for damage or leaks |
| **Hub & Drum Assemblies** | | | | | X | | Check for scoring or wear |
| **Brakes (Towable)** | | | | X | | X | Check operation and/or uneven wear |
| | | | | X | | | Test for proper drag and adjust as needed |
| | X | | | | | | Test braking function and performance |
| | X | | | | | | Inspect breakaway switch/pull pin (for resetable) and test for proper function |
| **Lug Nut Torque (Towable)** | X | | | | | | Lug nuts should be torqued to manufacturer specifications |
| **Tires** | X | | | | | | Tire pressure should be adjusted to match the specifications on the tire. |
| | X | | | | | | Inspect tire tread for unusual wear and proper tread depth |
